

Data protection declaration

The programs that you can download and install from the home pages of János L. Lábár (DiffMap, Simple_ePDF and ProcessDiffraction) are parts of the ProcessDiffraction_suite. The sole purpose and sole action of these programs is to process different forms of electron diffraction patterns to extract information about the structure of the measured samples.

These programs do NOT collect any personal information. Installation and usage of these programs do NOT involve either collection or storage of any personal information.
